Good things take time! Don't hurry be happy

We use only grass-fed beef from Argentina where the animals receive no additional grains to their diet. Living on the extensive pastures of Argentinian highlands they choose themselves between the juicy grass and wild herbs of the meadows.

In the preparation of the meat we apply a new grilling technique: supported with red-hot grilling weights made from cast iron, our steaks always receive the optimum amount of heat from all sides. During the process the core temperature is constantly measured for the best results. All our steaks are seasoned with sea salt and freshly round black pepper.
